ABOUT ME

I am a skilled web developer with a strong foundation in both front-end and back-end technologies, With two years of experience, I have successfully designed and developed responsive, interactive, and user-friendly web applications. My proficiency in HTML, CSS, JavaScript, and Django allows me to create efficient solutions that meet both client and user needs. Additionally, I have a solid understanding of SEO best practices, optimizing websites for better search engine visibility. I am passionate about continuous learning and solving complex challenges in web development, especially within the Django framework.

EDUCATION AND TRAINING

[2016 – 2024]

Computer & Automation Engineering

Damascus University

City: Damascus | Country: Syria |

WORK EXPERIENCE

[01/2024 – Current]

Software developer

Safari Trabzon

Country: United Arab Emirates

Safari Trabzon Company Internal System Development

Developed an internal work system for Safari Trabzon Company, a tourism brokerage specializing in offering tailored tourism programs for Trabzon city. The system was designed to streamline communication and coordination between key partners, including transportation providers, accommodation services, and airlines, ensuring smooth operations and enhanced customer experiences. This solution improved workflow efficiency and provided real-time updates, contributing to the company's ability to manage tourism logistics more effectively.

[2022 – 07/2024]

Software Developer

Anchor Learner

Country: United Arab Emirates

Worked as a backend applications developer for two years with a company specializing in AI-powered software development and research. My primary focus was using the Django framework to build scalable and efficient backend systems for various AI-driven projects. Throughout my time with the company, I contributed to multiple initiatives, leveraging AI capabilities to create innovative solutions and support the company's ongoing research efforts in artificial intelligence.

PROJECTS

[01/2021 – 04/2021]

A&H UMZÜGE

Developed and optimized the website for A&H UMZÜGE , a company that provides moving and related services in Germany. Focused on building responsive and mobile-friendly front-end interfaces, improving site performance, and ensuring a smooth user experience across all devices. Enhanced the website's structure to make it easier for users to access service information and request quotes. Worked closely with the client to ensure the design and functionality aligned with the company's goals and target audience.

[03/2021 – 05/2021]

Schoumi Power

Developed the website for a company specializing in cable extension services in Germany. The site highlights the company's expertise in cable installation, their experienced team, and their commitment to safety and quality. Built a user-friendly interface that presents the company's services, including equipment upgrades, cable dismantling, and eco-friendly disposal. The website effectively showcases the company's continuous investment in new equipment and expanding service offerings, making it easy for potential customers to learn about their services and get in touch.

[2023 – 2024]

Graduation Project

Developed a comprehensive examination system specifically designed for managing practical exams in the computer science labs at the University of Damascus. This system facilitates efficient administration and evaluation of students' practical skills, allowing instructors to create, manage, and assess exams effectively.

The system has been successfully implemented in the university's practical labs, providing a reliable platform for conducting and managing practical examinations.
